

Impactor® plus

- The ultimate masonry bit for mains and cordless drilling machines.
- Drills more holes per battery charge than other masonry bits.
- Available in a comprehensive range of sizes and lengths of up to 400mm.
- Extension bars available for deeper drilling.
- Fits a standard 3-jaw chuck machine.
- Packed in re-sealable tubes.

1. Manufactured from high grade alloy tool steel and furnace hardened to SDS standards, making bits stronger, more durable and safer to use.
2. Professional shot blasted finish reduces stress in the material and creates top quality appearance.

3. Geometrically designed flute maximises spoil evacuation from the drill head, improving speed and penetration rates.
4. Carbide tips are copper brazed to 1100°C, strengthening the bond between tip & body for increased longevity.

Typical Applications:

- The professional's choice for concrete, engineering brick and other hard masonry – eg. light-weight block, ceramic tiles, etc.
- Heavy-duty professional's masonry drill bit for use with rotary hammer action drills.

Product Specification

DRILL LENGTH (mm)	DIA. (mm)
85	4.5
100	5, 5.5, 6, 6.5, 7
120	8, 10
150	5, 5.5, 6, 6.5, 7, 8, 10, 12, 13, 14, 15, 16
160	18, 19, 20, 22, 25
200	8, 10, 12
300	7, 8, 10, 12, 14*, 16*, 20* 22*, 25*
400	10, 12, 13, 14, 16, 18, 20, 25
Extension sleeves*	14-16, 19-25

*Extension sleeves suitable for 300mm length (from 14-25mm) drill bits only.

Brick, Concrete &
Hard Masonry

Blue Flash™

- All-purpose masonry drill bit for rotary percussive drilling machines.

1. Brass brazed tungsten carbide tip, for high drilling speeds.
2. Longer sizes available.

Typical Applications:

- Tough and versatile drill bit for a variety of masonry substrates including brick, concrete, hard stone, lightweight block, ceramic tiles etc.
